EXPERIENCE AND EFFICIENCY IN FOREIGN TRADE

DCOMEX is a Pará-based international trade company specializing in customs clearance for import and export, supported by solid expertise in customs legislation and procedures enforced by Brazilian Customs.

We operate in a technical and structured manner to provide legal, administrative, and operational support for foreign trade operations, with special attention to suspension or exemption regimes for import duties and technical support for special export operations.

With a consultative approach and focus on efficiency, DCOMEX serves multiple foreign trade segments, structuring operations with safety, predictability, and optimized cost structure, always aligned with each client's requirements.

OUR PILLARS

Our Mission

Deliver complete foreign trade management and customs clearance with security, predictability, and efficiency, integrating people, processes, and technology to reduce client risks, timelines, and costs.

Our Vision

To be the leading company in the Northern region in customs management and international logistics, recognized for operational excellence, innovation, and transparency, elevating the standard of control and compliance in foreign trade.

Our Values

We operate with ethics and compliance, with responsibility and an ownership mindset. We ensure transparency and traceability at every stage, pursuing operational excellence and continuous improvement. We deliver agility with control, focusing on the client and practical innovation to provide greater predictability in operations.

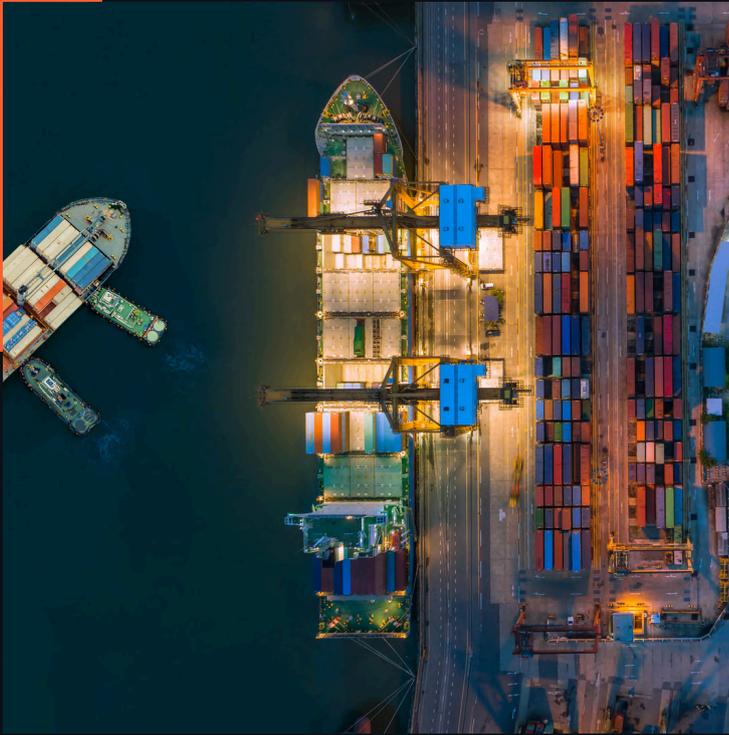

DCOMEX was founded in 2017 in Belém, Pará, based on the professional trajectory of its founder and CEO, Davison Marcos, who built over 15 years of experience in international trade at the traditional Escritório Geraldo Alencar, a historic reference in Pará for customs brokerage services. When the firm ceased operations in 2017, DCOMEX was established to continue this legacy of expertise and excellence.

Initially focused on customs clearance services, the company quickly consolidated its presence in Pará, with strategic operations in Belém and Vila do Conde, as well as strong interaction with airports and bonded facilities.

As international trade operations became more complex, DCOMEX evolved to offer comprehensive management of import and export processes, including operational planning, international freight coordination, shipment tracking, document auditing, customs process management, and coordination with regulatory authorities until final delivery.

Today, DCOMEX stands out for its high technical standards, organized operational processes, and the use of an online management system that provides real time visibility of operations, ensuring greater security, control, and efficiency for companies engaged in global trade.

WHY COMPANIES TRUST DCOMEX

Customs Specialization

Customs clearance as a core activity, with technical mastery and full control of processes.

Operational Security

Focus on legal compliance, risk mitigation, and operational predictability.

National Coverage

Presence at Brazil's main ports, airports, and borders, ensuring logistical fluidity.

Consultative Support

Technical analysis and strategic guidance tailored to each operation's needs.

COMPLIANCE

CODE OF ETHICS

Our Compliance rules are intended to establish standards and procedures that define DCOMEX's model of conduct, which must be followed by our internal and external employees, suppliers, and business partners, and observed by our clients.

This ensures that our corporate values are clearly and objectively established and disseminated, contributing to greater transparency in interpersonal relationships and in relations between companies and Government.
